2014-2024

Software Engineering Internship Experience

ThinkNeuro -Software Engineering Practicum

Remote

June 2026 – August 2026

- Engineered and optimized key browser-extension features using JavaScript, HTML, and CSS, improving performance and user workflow efficiency. Collaborated in an agile environment with Git/GitHub to maintain code quality and ensure cross-browser reliability.
- Utilized Git for robust version control, actively participating in branching strategies, pull requests, and code reviews to maintain code quality and ensure seamless team integration in a production environment.

Leadership & Activities

Youth Leadership

Class 20 Participant

Greenville, SC

August 2025 - March 2026

- Collaborated with peers to lead service initiatives supporting students and staff at Washington Center School, a local special-needs education community.

Diversity Awareness Youth Literacy Organization

Vice President

Greenville, SC

August 2024 - Current

- Boosted inclusive literacy impact by supporting programs reaching 300+ youth annually and helping raise reading engagement by 20% through culturally responsive education and community outreach.

FIRST

Mechanical Lead/Mentor

Greenville, SC

August 2024 - Current

- Advanced FRC mechanical engineering through machining, drivetrain assembly, and pneumatic integration to help the team reach the South Carolina State Championship.
- Mentoring with FLL research work through sensor testing, data analysis, and iterative solution validation that contributed to the team qualifying for California Nationals.

Projects and Skills

Language: Sinhala (Fluent). Spanish (Intermediate). Tamil (Intermediate). French (Beginner).

Projects: Smart Greenhouse Automation: Arduino-based IoT system using sensors and AI to automate soil, water, and nutrients for agriculture.
